

control system of ringing cyclically.....

1. Requirements

When somebody enters into your house from window illicitly, the detector which is installed at the window will detect and send a message to FAB, and FAB will dial your mobile phone 1, in case no one answers phone after 50 seconds, then after 10 seconds FAB will dial your mobile phone 2 continually, in case no one also answers phone after 50 seconds, then after 10 seconds FAB will dial your mobile phone 1 again. Do loop until phone is get through and the system is end by *9.

2. Components used

Input	Output
II the detector	

3. Advantages and Specialties

Fewer components are necessary than the traditional solutions.

4. Software Circuit Diagram
